As costs of health and pension benefits continue to increase substantially, sustaining these retirement benefits is increasingly difficult. To help UC develop a comprehensive, long-term approach, President Yudof has established a task force to study and recommend funding, policy, and benefits design alternatives. The Post-Employment Benefits Task Force will consider market competitiveness, workforce behavior and development, affordability, and sustainability, recognizing the need to maintain competitive post-employment benefits in order to recruit and retain quality faculty and staff for the University.

The Task Force will hold Listening Forums at UC Berkeley on **November 10, 2009 to give active faculty, staff, and retirees the opportunity to ask questions and share perspectives.** Task Force representatives will be present and will update Forum participants on Task Force activity to date and then respond to questions and comments. There will be separate Forums for faculty and staff. The schedule is as follows:

- |                                 |  |                          |
